SPANISH Mr. Sullivan	Thursday Rm. 232
WRITING FOR PUBLICATION Mrs. DiTuri	TBD Rm. 230
YEARBOOK CLUB Mr. Anderson	Wednesday Rm. 253

ART CLUB

Students will learn about art beyond the classroom. They will be exposed to a wide variety of art materials not available in the regular classroom setting.

ART FOR PUBLICATION

Students will work closely with the staff of Sojourn to produce our school newspaper. Although all students who wish to create drawings or photographs are encouraged to join, members are needed to prepare work for publication, to use desktop publishing, and to design newspaper pages.

CREATIVE WRITING CLUB

Students will develop their own personal writing style and create writing and poetry for a publication in the spring. The club will meet in a workshop format.

DIGITAL MEDIA CLUB

The Digital Media Club will meet the third Wednesday of every month. The Digital Media Club will support, instruct, direct and encourage all club members to complete technology projects that are creative and personally involving. The projects can also meet requirements for core curriculum classes or community service.

FRENCH CLUB

The club's goal is to foster understanding and appreciation of the French language and culture.

GO GREEN & CRAFTY

Learn how to create "green" crafts and to use what we have learned to create crafts to be donated to various community charities. No supply money is required, however we will ask for donations of recycled supplies.

HEALTH AND FITNESS

Students will be introduced to a variety of fitness activities that are fun and good for them. Activities include, dance (and a trip to a nursing home to perform), kickboxing, yoga, Pilates, running, stretching and discussion of nutrition.

ITALIAN CLUB

The club's goal is to foster understanding and appreciation of the Italian language and culture.

MATH OLYMPIAD

Students will participate in the Math Olympiad competition which is designed to build better math students through contests.

ROBOTICS

Students use LEGO Mindstorms to design, build, and program robots. They will learn about problem solving and teamwork through hands-on projects.

SADD

Members of SADD, Students Against Destructive Decisions, will work to send a strong message to our student body and community about destructive decisions such as violence, smoking, drinking, drug use, bullying, etc. Students will learn (and then teach) the communication skills that are necessary to make safe decisions.

SCIENCE OLYMPIAD

Life Science
Physical Science
Technology

Students will prepare for and participate in the NYS Science Olympiad competition.

SOMS AMERICAN IDOL

Students will present original poetry in a café setting as well as sing in a competition based on the show "American Idol". A grand finale will be presented in a café setting featuring the poets and singers.

SOMS MUSIC CLUB

This club encompasses all Music Department activities and includes all students involved in the music program at SOMS. The goal is to include students in the decision-making process so they have ownership in the program.

SOJOURN

We will produce a school newspaper on a monthly basis, written and published by middle school students. Students will write articles and learn how to interview other students and staff members for the newspaper.

SPANISH CLUB

The club's goal is to foster understanding and appreciation of the Spanish language and culture.

WRITING FOR PUBLICATION

Students are involved in writing, peer editing and the collaborative process that results in submission to SOJOURN and other forms of written publication.

YEARBOOK

Students will photograph, organize, create, and layout the middle school yearbook.
